

CNP Assurances Extends its Use of Prima Repository™.

PARIS – December 18th, 2008 – CNP Assurances, France's largest life and health insurer, has decided to extend its use of Prima Solutions' SOA Platform, Prima Repository™. This move results in an extended collaboration between CNP Assurances and Prima Solutions to develop specific features for its Insurance Workflow.

Since 2004, CNP Assurances has been using Prima Solutions' Prima Repository™, to implement new service oriented insurance applications and level its IT legacy assets. Two important projects have been based on this technology: a unified front-end portal for all insurance activities for the largest saving bank network and a mortgage insurance distribution platform.

CNP Assurances is now ready to take the next step on the implementation of service oriented insurance applications: It will extend its use of the Prima Repository™ and especially its use of the business process management suite to manage all of its projects. Furthermore, CNP Assurances has also decided to extend its use of the Prima Repository™ to their international offices.

Phat Chua Lim, CIO, CNP Assurances commented «*We have been really happy to work together with Prima Solutions for more than four years. Their product and consulting teams have been very reactive to our needs. This extended collaboration will enable us to better manage our insurance specific processes and deploy them progressively on different sites.* »

This decision to extend the use of the Prima Repository™ allows CNP Assurances to better manage the lifecycle of long running processes, enabling them to have different versions of an insurance process running in parallel or to "jump" from an existing version to a new definition of this process. To respond to their specific insurance workflow needs CNP Assurances has decided to work together with Prima Solutions to find the best solution in workflow insurance management. The changes issued from this collaboration will be included in the upcoming version of the Prima Repository™, Prima Repository™ 6.0.

About CNP Assurances

CNP has been the leading personal insurance company in France since 1991, with premium income of € 31.53 billion in 2007. With 150 years' experience in the business, CNP is renowned for its specialist know-how. The company's ambition is to offer to each and every one of its 22 million policyholders, including 14 million in France, high quality products to protect them against the risks of everyday life and to meet their savings needs in each phase in their life.

About Prima Solutions

Prima Solutions provides standard-based software to support incremental transformation of existing Insurance IT systems into component-based Service Oriented Applications. Built around an extensive Insurance Reference Model (Prima IBCS), a template-based code generation toolset and an innovative business service repository, Prima Repository complements existing infrastructure to enable a pragmatic and efficient approach to SOA transformation. Dedicated to the insurance industry, Prima Solutions offers new technology to promote Reusability and renewed Business and Technical Agility.

Founded in 1999 Prima Solutions operates globally from offices in Paris and Chicago. Customers include Safeco, Burns and Wilcox, Wipro, Patni, Generali, Kiln, La Réunion Aérienne, Eurolife, RLI Insurance Corp, Farm Bureau, B2V, CNP Assurances, Swiss Life, Groupama and AGPM. Projects implemented by these customers involve General, Health, Life and Pension Insurance products for core distribution, underwriting, policy administration and claims processing. Prima Solutions is a member of ACORD and OMG.
